Additional considerations

In addition to these requirements, the underwriter also takes into account insurable interest/insurable loss, and the net worth and assets required to justify the requested coverage.

• Insurable interest/insurable loss

The first consideration in financial underwriting is to establish that an insurable interest exists. The concept of insurable interest is fundamental to ensuring that the insurance applied for makes economic sense. We consider insurable interest as existing when the owner (if other than the insured) and the designated beneficiary have a financial interest in the continued life of the insured and are able to demonstrate a measurable financial loss should the insured die prematurely. The loss should equal or exceed the requested insurance amount. The underwriter will examine the amount of potential loss suffered by an owner/beneficiary in the context of the requested death benefit, purpose of coverage and financial profile (including the ability to pay ongoing premiums). It is the risk of loss that helps the underwriter quantify the amount of insurable interest and ultimately justify the requested death benefit.

• Justifying the coverage

John Hancock underwriters also consider a client's global net worth when determining capacity and justification for the coverage requested.

Example

Application

- 55-year-old male, citizen of the UK
- Applying for \$10 million (typically would require net worth of \$7-8 million to qualify); no coverage in force with John Hancock
- Net worth — \$12 million (\$3 million US; \$9 million foreign)
- \$3 million US brokerage account, and
- Three week-long trips per year to Miami for business

Financial Presence and Nexus guideline

- The lesser of \$200K or 25% of requested death benefit in US assets
- Business trips to Miami

CONCLUSION: The client is eligible for the \$10M he applied for
