eApp — Save Time, Eliminate Errors, Sell More

eApp is an online submission process for insurance. Unlike the Drop Ticket option, you complete the application at your own pace with the option to print or submit it electronically. Our eApps enable you to improve efficiency and productivity by reducing errors and producing 100% in good order application submissions. With applications arriving at the carrier in good order, your cases can be expedited. The bottom line: You can eliminate up to 14 days from the process[1], enabling you to sell more insurance.

Get Started

Once you input the carrier name, product type, product, and state, our easy-to-use intelligent wizard screens walk you through the process. Green "completed" checkmarks appear when fields are in good order. You can view/print the forms and save/update them. Finally, print and sign the forms or submit them electronically.

1. Login to your Crump website

2. Click Transaction Center in the main navigation

3. Click Start New App under Transact & Apply

4. Complete the Application Selector and select eApp fulfillment (view additional steps on page two)

Benefits to You

- Access to over 30 eApps from more than 15 leading life insurance carriers[2]
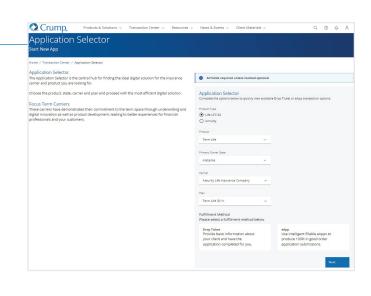

- An intelligent, fillable form with eSignature and eSubmission

- Flexibility to interview your client and order the medical requirements on your own

- Reduce paper and produce 100% in good order application submissions

- Cases process 14 days faster[1] on average

- Earn the same compensation as a paper application, only faster

- View real-time status, 24/7

4. Complete the Application Selector and select eApp fulfillment.

5. Complete all yellow-shaded fields until all green checkmarks are displayed.

6. Lock the application and complete the steps for eSignature.

7. Your client will receive the application via email to review and eSign.

8. Once the client eSigns, you will receive the application via email to review and eSign.

9. Once you sign, Crump and the carrier will receive the application for underwriting.
